

PEDIATRIC REHABILITATION & DEVELOPMENTAL SERVICES

Multi-Disciplinary Assessment Report

Speech & Language Therapy • Occupational / Psychomotor Therapy • Clinical Psychology

Confidentiality Statement: This report contains sensitive clinical information intended solely for the qualified professionals, caregivers, and educators directly involved in the child's care. Any disclosure, sharing, or duplication of this report requires prior written consent from the child's legal guardians and should be limited to individuals directly involved in the child's therapeutic, educational, or clinical support.

38 Educational / School Support

39 General Recommendations

40 Academic Recommendations

41 Prognosis

Section 01

Reason for Referral

[Child's Full Name], a [age] [boy/girl], was referred for a comprehensive multi-disciplinary assessment. [Summarise the presenting concerns — e.g., communication, social interaction, behavioural regulation, sensory processing, motor coordination, cognitive functioning, adaptive skills, or academic participation.]

The purpose of this assessment is to:

- Assess the child's current developmental and functional abilities across multiple domains.
- Identify strengths and areas of difficulty impacting daily functioning and learning.
- Evaluate speech-language, occupational/psychomotor, and psychological/behavioural functioning.
- Establish therapeutic priorities and intervention targets.
- Support individualised educational planning and multi-disciplinary intervention.

Case History

[Summarise relevant prenatal, birth, medical, and developmental history, or note if this information was limited at the time of assessment.]

[Summarise the child's current overall presentation across communication, social, sensory, cognitive, adaptive, and motor domains.]

Caregiver report and clinical observation indicate that *[Child]* demonstrates:

- *[Reported behaviour or concern 1]*
- *[Reported behaviour or concern 2]*
- *[Reported behaviour or concern 3]*
- *[Reported behaviour or concern 4]*
- *[Reported behaviour or concern 5]*
- *[Reported behaviour or concern 6]*

[Note any strengths or positive indicators observed, e.g., social interest, emerging skills, or responsiveness to support, suggesting rehabilitation potential.]

Administered Tests

SPEECH & LANGUAGE THERAPY

- Clinical observation
- Informal receptive and expressive language assessment
- Functional communication observation
- Oral motor observation
- Communication Matrix – Professional Version
- Speech-language sampling

OCCUPATIONAL / PSYCHOMOTOR THERAPY

- Clinical observation
- Functional motor assessment
- Fine motor and graphomotor observation
- Sensory processing clinical observation
- Activities of daily living (ADL) observation

CLINICAL PSYCHOLOGY / BEHAVIOURAL FUNCTIONING

- Verbal Behavior Milestones Assessment and Placement Program (VB-MAPP)
- Childhood Autism Rating Scale – Second Edition (CARS2-ST)
- Sensory Processing Measure – Second Edition (SPM-2): clinical observation protocol
- Behavioural observation
- Functional interaction assessment

Section 04

Receptive Language

[Summarise receptive language abilities and how they affect comprehension of verbal instructions and functional understanding.]

- *[Observation on response to name.]*
- *[Observation on following one-step instructions.]*
- *[Observation on following two-step instructions.]*
- *[Observation on response to visual/gestural support.]*
- *[Observation on response latency/processing time.]*
- *[Observation on understanding of familiar objects/routines.]*
- *[Observation on attention to verbal input.]*

[Note the functional impact of receptive language difficulties on participation.]

Section 05

Expressive Language

[Summarise current expressive language level, e.g., non-verbal, single words, phrases, sentences.]

- *[Observation on spoken words/vocabulary.]*
- *[Observation on vocalisations and sound approximations.]*
- *[Observation on echolalia or repetitive vocalisations, if present.]*
- *[Observation on functional requesting skills.]*
- *[Observation on spontaneous communication initiation.]*
- *[Observation on choice-making between items.]*
- *[Observation on non-verbal communication behaviours, e.g., reaching, gestures.]*

[Note communicative intent observed despite expressive limitations, if applicable.]

Section 06

Speech Production

[Summarise speech production abilities relative to age expectations.]

- *[Observation on vocal imitation abilities.]*
- *[Observation on verbal output/intelligibility.]*
- *[Observation on articulation or oral-motor findings.]*
- *[Observation on repetitive vocalisations, if present.]*

[Note any oral-motor findings relevant to feeding/swallowing, or recommend further oral-motor examination if indicated.]

Section 07

Pragmatic & Social Communication

[Summarise pragmatic and social communication skills.]

- *[Observation on eye contact.]*
- *[Observation on joint attention.]*
- *[Observation on turn-taking abilities.]*
- *[Observation on reciprocal interaction.]*
- *[Observation on engagement with peers/adults.]*
- *[Observation on social initiation.]*

OBSERVED STRENGTH

[Note social awareness/interest strengths observed, e.g., proximity-seeking, physical engagement, orientation to others.]

Section 08

Written Language & Pre-Academic Skills

READING READINESS

[Summarise pre-literacy skills, e.g., letter/number recognition, visual discrimination, symbolic attention.]

COMPREHENSION

[Summarise functional comprehension of verbal information, questions, and sequential instructions.]

WRITING READINESS

[Summarise pre-writing skills, e.g., fine motor control, graphomotor ability, visual-motor integration, task endurance.]

Section 09

Cognitive-Communication Skills

[Summarise cognitive-communication abilities: attention, initiation, problem-solving, sequencing, memory, processing speed.]

Benefits from:

- *[Support strategy 1, e.g., repetition/structured routines.]*
- *[Support strategy 2, e.g., simplified single-element instructions.]*
- *[Support strategy 3, e.g., visual/gestural support.]*
- *[Support strategy 4, e.g., extended wait-time.]*

Section 10

Functional Communication Profile

[Summarise the child's overall communication profile and intentionality — conventional and unconventional behaviours used to communicate.]

[Note whether Augmentative and Alternative Communication (AAC) or other communication supports are recommended, and why.]

ASSESSMENT RESULTS

Occupational / Psychomotor Therapy

Section 11

Behavioural Observation

[Describe the child's general presentation and behaviour during assessment sessions.]

- *[Observation on attention span.]*
- *[Observation on engagement/cooperation with preferred vs. non-preferred tasks.]*
- *[Observation on redirection needed to stay on task.]*
- *[Observation on response to therapist interaction/guidance.]*

Section 12

Interactive Modalities

[Summarise reciprocal interaction and social communication skills during OT sessions.]

- *[Observation on eye contact and joint attention.]*
- *[Observation on response to one-to-one vs. group interaction.]*
- *[Observation on engagement during structured play/visual tasks.]*

Section 13

Relationship to Objects

[Describe how the child explores and interacts with toys, tools, and familiar objects.]

- *[Observation on visual/tactile exploration style.]*
- *[Observation on purposeful manipulation during constructional/fine motor play.]*
- *[Observation on tool use and object organisation.]*
- *[Factors influencing object use, e.g., strength, coordination, or motor planning.]*

Section 14

Body Scheme & Body Awareness

[Describe the child's body scheme and body awareness during movement-based tasks.]

- *[Observation on body positioning awareness.]*
- *[Observation on motor planning during movement tasks.]*
- *[Observation on imitation of body movements/postures.]*
- *[Observation on body-part awareness and movement organisation.]*

Section 15

Sensory Processing

[Summarise sensory processing difficulties and their impact on attention, regulation, and participation.]

Proprioceptive

[Observation on proprioceptive processing.]

Vestibular

[Observation on vestibular processing.]

Visual

[Observation on visual processing.]

Tactile

[Observation on tactile processing.]

Auditory

[Observation on auditory processing.]

Overall Impact

[Summarise the combined functional impact of the above.]

CLINICAL NOTE

[Note which sensory strategies the child responds well to, e.g., specific input types that support regulation.]

Section 16

Muscle Tone & Strength

[Summarise findings on muscle tone and strength.]

- *[Observation on upper limb strength during weight-bearing/resisted tasks.]*
- *[Observation on core/postural strength and endurance.]*
- *[Observation on grip strength.]*
- *[Observation on muscle tone during movement.]*

Section 17

Laterality

[Summarise hand/foot/eye dominance and bilateral coordination during fine and gross motor tasks.]

- *[Observation on hand dominance consistency.]*
- *[Observation on bilateral coordination during tasks.]*

Section 18

Gross Motor Skills

[Summarise gross motor coordination relative to age expectations.]

- *[Observation on following gross motor instructions.]*
- *[Observation on running, jumping, and climbing.]*
- *[Observation on movement sequencing and bilateral coordination.]*
- *[Observation on endurance during physical activity.]*

[Note a strength to build on for further gross motor development.]

Section 19

Fine Motor & Graphomotor Skills

[Summarise fine motor and graphomotor development relative to age expectations.]

- *[Observation on following fine motor instructions.]*
- *[Observation on grasp patterns and pencil grip.]*
- *[Observation on copying shapes/lines and visual-motor integration.]*
- *[Observation on grip endurance during table-top tasks.]*
- *[Observation on bilateral hand use during constructional play.]*

Section 20

Space & Time Structuring

[Summarise the child's understanding of spatial concepts, sequencing, and temporal organisation.]

- *[Observation on organising movement within space.]*
- *[Observation on following sequential/multi-step tasks.]*

Section 21

Balance & Postural Control

[Summarise balance and postural control findings, linking to sensory processing where relevant.]

- *[Observation on single-limb balance and dynamic movement.]*
- *[Observation on postural stability when reaching outside base of support.]*
- *[Observation on balance over uneven/unstable surfaces.]*

Section 22

Upper Limb Function

[Summarise upper limb function during weight-bearing, reaching, and manipulative tasks.]

- *[Observation on strength during weight-bearing activities.]*
- *[Observation on fatigue during reaching/overhead activities.]*
- *[Observation on grip and carrying endurance.]*

Section 23

Attention & Participation

[Summarise overall attention span and how participation is influenced by motivation.]

- *[Observation on sustained attention during non-preferred/structured tasks.]*
- *[Observation on attention/participation during motivating activities.]*
- *[Strategies that help sustain engagement.]*

OBSERVED STRENGTH

[Note how motivation influences engagement, cooperation, and instruction-following.]

Section 24

Cognitive Skills

[Summarise cognitive skills affecting functional performance: attention, problem-solving, sequencing, comprehension, processing speed, task persistence.]

[Note strategies the child benefits from, e.g., repetition, visual support, structured routines.]

ASSESSMENT RESULTS

Clinical Psychology / Behavioural Functioning

Section 25

Behavioural Presentation & Functional Baseline

[Describe the child's behavioural presentation during assessment, e.g., response latency, compliance, tolerance for structured tasks.]

[Summarise standardised assessment results, e.g., CARS2-ST score, and clarify how the result should be used to inform intervention planning rather than as a stand-alone diagnostic basis.]

[Note primary barriers affecting learning and participation, e.g., prompt dependency, attention, sensory regulation.]

Section 26

Developmental & Learning Potential

[Summarise developmental/learning assessment results, e.g., VB-MAPP domains, relative strengths and learning barriers.]

- *[Observation on relative strengths, e.g., manding, independent play.]*
- *[Observation on learning barriers, e.g., prompt dependency, listener responding.]*

[Note emerging skills relevant to intervention planning, e.g., imitation potential, to be developed collaboratively with other disciplines.]

Section 27

Sensory Processing & Self-Regulation

[Summarise how sensory regulation influences attention, engagement, and readiness to learn from a behavioural perspective.]

- *[Observation on self-regulation strategies used by the child, e.g., movement, rhythmic activity.]*
- *[Observation on tolerance of physical guidance/prompting.]*

[Note recommended regulation strategies, e.g., modelling, visual/gestural cues, systematic prompt fading.]

Section 28

Social-Emotional & Behavioural Regulation

[Summarise social-emotional functioning and behavioural regulation observed during assessment.]

- *[Observation on emotional expression and regulation.]*
- *[Observation on frustration tolerance.]*
- *[Observation on social referencing and relationship-building.]*

Section 29

Adaptive Functioning

[Summarise adaptive daily living skills and independence across home, school, and community settings.]

- *[Observation on self-care/daily living skills.]*
- *[Observation on independence in familiar routines.]*

Section 30

Clinical Formulation

[Synthesise the child's overall developmental profile across all three disciplines.]

Primary functional barriers include:

- *[Barrier 1]*
- *[Barrier 2]*
- *[Barrier 3]*
- *[Barrier 4]*

Despite these challenges, the child demonstrates important developmental strengths, including:

- *[Strength 1]*
- *[Strength 2]*
- *[Strength 3]*

[State the overall rehabilitation potential and recommended intervention approach.]

Section 31

Summary of Findings

[Child's Full Name] is a [age] [boy/girl] presenting with the following key findings:

- *[Key finding 1 — e.g., communication/language.]*
- *[Key finding 2 — e.g., social interaction.]*
- *[Key finding 3 — e.g., sensory processing/regulation.]*
- *[Key finding 4 — e.g., cognitive/attention.]*
- *[Key finding 5 — e.g., motor skills.]*
- *[Key finding 6 — e.g., adaptive functioning.]*
- *[Key strength 1]*
- *[Key strength 2]*

[Closing summary statement on overall profile and outlook.]

Section 32

Therapeutic Objectives

SPEECH & LANGUAGE THERAPY

- *[Objective 1]*
- *[Objective 2]*
- *[Objective 3]*
- *[Objective 4]*

OCCUPATIONAL / PSYCHOMOTOR THERAPY

- *[Objective 1]*
- *[Objective 2]*
- *[Objective 3]*
- *[Objective 4]*

CLINICAL PSYCHOLOGY

- *[Objective 1]*
- *[Objective 2]*
- *[Objective 3]*
- *[Objective 4]*

Short-Term Goals (3–6 Months)

COMMUNICATION / SLP GOALS

DOMAIN	GOAL
Functional Requesting	Within [] months, [Child] will [], in [] out of [] opportunities across [] sessions.
Imitation	Within [] months, [Child] will [], in []% of opportunities.
Vocal Imitation	Within [] months, [Child] will [], in [] out of [] trials.
Instruction Following	Within [] months, [Child] will [], in [] out of [] opportunities.
Joint Attention	Within [] months, [Child] will [] for at least [] minute(s) with support.

OCCUPATIONAL / PSYCHOMOTOR GOALS

DOMAIN	GOAL
Sensory Regulation	Within [] months, [Child] will [], in [] out of [] sessions.
Fine Motor	Within [] months, [Child] will [], with [] assistance.
Gross Motor	Within [] months, [Child] will [], in [] out of [] opportunities.
Balance	Within [] months, [Child] will [], in [] out of [] tries.
Upper Limb Strength	Within [] months, [Child] will [] for [] seconds with minimal support.
Attention / Task Engagement	Within [] months, [Child] will [] for [] consecutive minutes with minimal redirection.

BEHAVIOURAL / ADAPTIVE GOALS

DOMAIN	GOAL
Initiation	Within [] months, [Child] will [], in [] out of [] opportunities across [] sessions.
Regulation	Within [] months, [Child] will [], remaining engaged for [] minutes with no more than [] redirections.
Transitions	Within [] months, [Child] will [], requiring no more than [] additional prompt(s).
Social Engagement	Within [] months, [Child] will [], in [] out of [] opportunities.
Adaptive Behaviour	Within [] months, [Child] will [], with [] support.

Long-Term Goals (6–12 Months)

COMMUNICATION / SLP GOALS

DOMAIN	GOAL
AAC / Functional Communication	<i>Within [] months, [Child] will [] consistently across home and school environments.</i>
Receptive Language	<i>Within [] months, [Child] will [], in [] out of [] trials.</i>
Social Communication	<i>Within [] months, [Child] will [] for a minimum of [] exchanges per session.</i>
Speech Intelligibility	<i>Within [] months, [Child] will [], as measured by [].</i>

OCCUPATIONAL / PSYCHOMOTOR GOALS

DOMAIN	GOAL
Sensory Integration	<i>Within [] months, [Child] will [] with minimal adult support.</i>
Motor Coordination	<i>Within [] months, [Child] will [] with reduced adult assistance.</i>
Graphomotor Skills	<i>Within [] months, [Child] will [] with reduced hand-over-hand assistance.</i>
Balance & Postural Control	<i>Within [] months, [Child] will [] with only standby supervision.</i>
Functional Independence	<i>Within [] months, [Child] will [] with minimal assistance.</i>

BEHAVIOURAL / ADAPTIVE GOALS

DOMAIN	GOAL
Independence	<i>Within [] months, [Child] will [], completing at least [] step(s) with no more than [] prompt(s).</i>
Communication Initiation	<i>Within [] months, [Child] will [] across at least [] setting(s).</i>
Adaptive Participation	<i>Within [] months, [Child] will [], as documented by caregiver/therapist report.</i>
Behavioural Regulation	<i>Within [] months, [Child] will [], in [] out of [] opportunities.</i>

Section 35

Speech & Language Therapy Recommendations

Speech and Language Therapy is recommended at a frequency of _____ sessions weekly, focusing on:

● [Recommendation 1]

● [Recommendation 2]

● [Recommendation 3]

● [Recommendation 4]

● [Recommendation 5]

● [Recommendation 6]

Section 36

Occupational / Psychomotor Therapy Recommendations

Occupational and Psychomotor Therapy is recommended at a frequency of _____ sessions weekly, focusing on:

● [Recommendation 1]

● [Recommendation 2]

● [Recommendation 3]

● [Recommendation 4]

● [Recommendation 5]

● [Recommendation 6]

Section 37

Clinical Psychology Recommendations

Behavioural and psychological intervention is recommended to support:

● [Recommendation 1]

.....

● [Recommendation 2]

.....

● [Recommendation 3]

.....

● [Recommendation 4]

.....

● [Recommendation 5]

.....

● [Recommendation 6]

Section 38

Educational / School Support

[State whether specialised educational support or an Individualised Education Program (IEP) is recommended, and the areas it should address.]

● [Recommendation 1]

.....

● [Recommendation 2]

.....

● [Recommendation 3]

.....

● [Recommendation 4]

Section 39

General Recommendations

● [General recommendation 1]

● [General recommendation 2]

● [General recommendation 3]

● [General recommendation 4]

● [General recommendation 5]

● [General recommendation 6]

● [General recommendation 7]

● [General recommendation 8]

Section 40

Academic Recommendations

● [Academic recommendation 1]

● [Academic recommendation 2]

● [Academic recommendation 3]

● [Academic recommendation 4]

● [Academic recommendation 5]

● [Academic recommendation 6]

● [Academic recommendation 7]

Section 41

Prognosis

[State the expected outlook with consistent multi-disciplinary therapy, specialised educational support, family involvement, and regular reassessment.]

Closing Statement
